## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Allowable Subject Matter*

2. Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or fairly suggest:

"A camera operating apparatus for operating at least one camera unit at first and second operation speeds and at an operation direction which are to be changed by an operator, comprising:

a retainer having an operation surface.

a joystick mounted on said retainer and said operation surface of said retainer to input a first speed signal indicative of said inclination angle varied in response to said first operation speed to said camera unit.

a plurality of keys each operatively arranged on said retainer to perform a key-pushed action and a key-released action, each of said keys being operative to input a key signal indicative of said key-pushed action, said keys including one specified key

Art Unit: 2615

selected for said second operation speed to said camera unit desired by said operator;  
and

output signal generating means for generating a second speed signal indicative of said second operation speed to said camera unit based on said first speed signal from said joystick and said key signal from said specified key, said output signal generating means being operative to output said second speed signal to said camera unit to ensure said second operation speed to said camera unit desired by said operator." in combination with other elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a) Miura et al. (US-5,973,471) disclose a micromanipulator system wherein the joystick and keybroad are used to control a camera's speed and direction.

b) Rodes et al. (US-5,745,166) disclose a video security system allowing manual operation from the keyboard and joystick.

c) Wakiyama et al. (US-6,392,693) disclose a monitoring video camera apparatus wherein the controller of the camera generates and transmits the command in response to the operation keys and joystick.

d) Wada et al. (US-6,744,461) disclose a monitor camera system turning to a preset direction in response to the numeric key-pad.

e) Paff et al. (US-5,430,511) disclose a controller for surveillance camera which enables operators' fingers to control a plurality of functions of camera and lens.

f) Paff et al. (US-5,801,770) disclose a surveillance apparatus with enhanced control of camera and lens assembly.
